

REPRODUCTIVE JUSTICE NOW!!!

Reproductive rights are human rights.

SAFE ABORTION SAVES LIVES

Reproductive Rights are Human Rights

Restrictive abortion laws have been linked to discrimination against women and gender diverse persons. These laws do NOT prevent abortions, they only force people to have unsafe abortions. The benefits of creating greater access to abortion as well as creating less restrictive abortion laws include:

- Reducing the number of unsafe abortion related deaths. According to Stories and Information about Unsafe Abortion in Namibia Report compiled by the Namibian Women's Health Network
- countries with liberal abortion laws have lower abortion rates than counties with restrictive abortion laws.
- Increasing the accessibility of the full provision to reproductive healthcare services.
- Ensuring that women and gender diverse persons enjoy the full spectrum of human rights, specifically, sexual reproductive health and rights.
